

# DONATING BLOOD SAMPLES FOR COVID-19 RESEARCH

## WHAT YOU CAN EXPECT

### **Tested for COVID-19**

#### POSITIVE RESULTS

You have tested positive for the COVID-19 virus and are currently infected or have recovered and are now symptom free.

### **Submit donor registration form**

#### BE A PART OF THE CURE

If you're a match with a research study in your area, a Research Coordinator will contact you to discuss next steps.

### **Speak with Research Coordinator**

#### GET ANSWERS TO YOUR QUESTIONS

During your scheduled call, you will walk through a short health screening, learn details about the study, provide your consent, and schedule a date and time for your 15-minute blood draw.

### **Schedule your sample donation**

#### ON-LOCATION OR MOBILE

Your collection can take place at an on-site location in your area or we can schedule a sample collection in your home. The appointment will require about 15 minutes to collect a few tubes of blood.

### **Receive a small stipend**

#### THANK YOU FOR DONATING!

Being a part of the COVID-19 cure is a huge benefit for all of us. You may also receive a small stipend for your participation.

**KEEP THE MIRACLES COMING.**

## What are the donor requirements?

### CONFIRM POSITIVE RESULTS

- Currently have or previously had COVID-19
  - Have documentation of a positive COVID-19 test result
  - Are at least 18 years old with a photo ID
  - Meet any other eligibility criteria specific to the selected research study
  - Be willing to sign a consent form for your participation in a research study
  - Willing to disclose if you have ever been diagnosed with Hepatitis B, C and/or HIV.
  - Willing to provide a few tubes of blood
- 

## How long will all of this take?

### TIME COMMITMENT IS MINIMAL

Your scheduled call with the Research Coordinator should only take about 10-15 minutes. On the day of collection, you will be donating just a few tubes of blood, which should take no more than 15 minutes.

---

## Will I be selected to donate for a research study?

### MANY DONORS ARE NEEDED

There are currently many research projects that need sample donations. Various factors may influence whether you are selected for a project, including when you were diagnosed, where you are in your recovery, where you live, as well as your age and gender.

---

## Will my blood donation make a difference?

### YOUR SUPPORT IS KEY

Scientists desperately need blood from COVID-19 patients for their research. Your sample donation will contribute to a better understanding of COVID-19 and may ultimately lead to new tests, treatments, and vaccines for the disease.

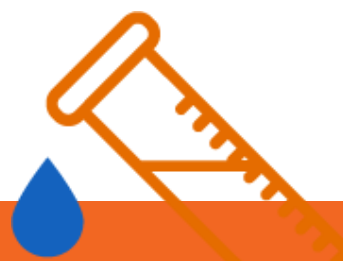

---

## Where can I find a donor registration form?

### REGISTERING IS QUICK AND EASY

Go to [iSpecimen.com](https://www.ispecimen.com) where you will find a link on our home page to additional information and the [online donor registration form](#). You can complete and submit the form online - it only takes a few minutes!
